The National Narcotics Agency (BNN) held a meeting to prepare the 2025–2029 Strategic Plan (Renstra), at R. Soetomo BNN, Cawang, East Jakarta, on Wednesday (21/5). This activity is an important step in formulating the direction of BNN's internal policy regarding the Prevention and Eradication of Narcotics Abuse and Illicit Trafficking (P4GN) for the next five years.

The meeting was attended by high-ranking and junior officials within the BNN, as an

organization's work.

"If the planning is good, then 50% of our work is actually done. Therefore, today we are compiling and formulating the five-year plan for the future. I ask that this be done seriously, not just copy-paste from previous documents. Planning must look at real conditions, based on facts that have occurred and future possibilities. We identify obstacles, then we formulate the future direction objectively and strategically," he said.

As part of a focused and systematic drafting process, the preparation of the background study for the 2025–2029 BNN Strategic Plan has been carried out since 2023, including an evaluation of the implementation of the previous Strategic Plan, a strategic environmental study, and identification of priority issues that will form the basis for determining the direction of future policies.

The 2025–2029 Renstra is prepared in line with the 7th National Priority, with the target of reducing the prevalence of drug abuse from 1.73% (2024) to 1.70% (2025) and 1.60% in 2029. To achieve this, the BNN has set four main strategic issues in this Renstra, namely:
1. Defense and security,
2. Human development,
3. Collaboration between stakeholders, and
4. Institutional capabilities.

The 2025–2029 BNN Strategic Plan was prepared in line with the National Medium-Term Development Plan (RPJMN) and other national policies, and is expected to be a comprehensive guide in directing BNN's steps towards a sustainable and highly resilient Shining Indonesia against the threat of narcotics.
